

## Dr. Kedar N Ganla

Consultant Fertility Physician  
Ankoor Fertility Center, Mahim

He consults patients with various infertility problems, goes to the core of the problem and advises accordingly. His infertility management not only includes medical management and ART procedures but also counseling for stress management and lifestyle modification. Many patients have benefited with this different approach to their problem. He is MD Gynecology in practice for last 20 years. He has been at the Forefront of Assisted Reproductive Technology since 1996. He has worked with thousands of infertile patients over the last decade using a combination of attentive personal care and advanced medical technology.

Dr. Kedar had been a consultant fertility physician at Hiranandani hospital, Department of Assisted Reproductive technology and stem cell research at Regensis-Reliance Life Sciences, Mumbai and previously as Clinical Associate in the Department of Assisted Reproduction and Genetics, Jaslok Hospital, Mumbai.

He is an accomplished clinical researcher and an author of numerous articles at National and International Publications on infertility.
